**PLAN TO OFFER COMPARABLY EFFICIENT
INTERCONNECTION TO PAYPHONE SERVICE PROVIDERS**

The Bell Atlantic telephone companies¹ hereby submit a plan to offer comparably efficient interconnection ("CEI") to payphone service providers ("PSPs"). Bell Atlantic plans to offer deregulated payphone services, including public, semi-public and inmate payphone services, on an integrated basis throughout its operating areas.

I. Introduction and Summary

Section 276 of the Telecommunications Act of 1996 ("1996 Act")² required the Commission to prescribe new regulations implementing the provisions of the 1996 Act

¹ The Bell Atlantic telephone companies are Bell Atlantic - Delaware, Inc.; Bell Atlantic - Maryland, Inc.; Bell Atlantic - New Jersey, Inc.; Bell Atlantic - Pennsylvania, Inc.; Bell Atlantic - Virginia, Inc.; Bell Atlantic - Washington, D.C., Inc.; and Bell Atlantic - West Virginia, Inc., hereinafter collectively "Bell Atlantic."

² Pub. L. No. 104-104, 110 Stat. 56 (1996); 47 U.S.C. § 276.

relating to payphone services, and the Commission has done so.³

In its initial Payphone Order, issued on September 20, 1996, the Commission determined that “incumbent LEC payphones must be deregulated, detariffed and classified as CPE [customer premises equipment] for regulatory purposes.”⁴ The Commission also prescribed nonstructural safeguards with which the Bell Operating Companies (“BOCs”) must comply in providing deregulated, detariffed payphone services in the future. Specifically, the Commission concluded that BOC payphone service providers, such as Bell Atlantic, must comply with the same nonstructural safeguards that apply to the provision of enhanced services under the Commission’s *Computer III Inquiry* and *ONA* requirements, including the filing of a CEI plan.⁵ Accordingly, Bell Atlantic files this CEI plan to offer deregulated payphone services on a structurally unseparated basis.

II. Compliance with CEI Plan Requirements

The Commission specified the showings that must be included in a CEI plan in its initial *Computer Inquiry III Report and Order*.⁶ The Commission also summarized the

³ *Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996*, CC Docket Nos. 96-128 and 91-35, *Report and Order*, FCC 96-388 (rel. Sept. 20, 1996) (hereinafter “Payphone Order”); *Order on Reconsideration*, FCC 96-439 (rel. Nov. 8, 1996) (“Payphone Reconsideration Order”).

⁴ Payphone Order at ¶ 142.

⁵ *Id.* at ¶¶ 199, 202 (“BOCs must file CEI plans describing how they will comply with the *Computer III* unbundling, CEI parameters, accounting requirements, CPNI requirements as modified by Section 222 of the 1996 Act, network disclosure requirements and installation, maintenance, and quality nondiscrimination requirements.”)

⁶ *Amendment of Section 64.702 of the Commission’s Rules and Regulations (Third Computer Inquiry)*, *Report and Order*, 104 FCC 2d 958 (1986) (“CI III Phase I Order”).

CEI requirements as they apply to payphone services in the Payphone Order.⁷ Bell Atlantic makes the required showings as follows:

A. *Description of Service.*

As defined in the 1996 Act, “payphone service” in this plan “means the provision of public and semi-public pay telephones, the provision of inmate telephone service in correctional institutions, and any ancillary services.”⁸ Bell Atlantic will provide its payphone services using both coin and coinless payphones. These payphones will be placed pursuant to agreements with location providers and will be used by location providers, their patrons, and the transient public to make coin, collect, calling card, or other types of payphone calls.

Bell Atlantic and other carriers will provide the underlying transmission services from Bell Atlantic’s payphones. The presubscribed interexchange carrier for the transport of interLATA calls from these payphones will be selected by, or pursuant to agreement with, the location provider. Alternatively, end users may use interexchange carriers other than the payphone’s presubscribed carrier through the use of access codes. Bell Atlantic will not transport or resell any transport of calls across LATA boundaries that it is not now authorized to carry until Bell Atlantic obtains in-region interLATA relief pursuant to the 1996 Act.

⁷ Payphone Order at ¶ 203, *citing* CI III Phase I Order, 104 FCC 2d at 1039-1043. (A BOC’s CEI plan must explain how it will comply with the “equal access parameters for the specific payphone service it intends to offer,” including “interface functionality; unbundling of basic services; resale; technical characteristics; installation, maintenance and repair; end user access; CEI availability; minimization of transport costs; and availability to all interested customers or enhanced service providers.”)

⁸ 47 U.S.C. § 276(d).

As required by the Payphone Reconsideration Order, all underlying basic network services that will be used by Bell Atlantic to provide its payphone services have been or will be unbundled from its payphones, and provided under tariff to unaffiliated PSPs on a nondiscriminatory basis.⁹ These basic services include new dial tone line offerings for use with network controlled (“dumb”) payphones as well as currently tariffed dial tone line services for use with station controlled (“smart”) payphones and inmate payphones.¹⁰

B. Unbundling of Basic Services.

As shown in the illustrative state tariffs contained in Attachment A, all of the underlying transmission and basic network services will be unbundled from Bell Atlantic’s payphone CPE and will be accessible to unaffiliated PSPs under the same rates, terms and conditions as apply to Bell Atlantic’s PSP operations.

The Commission has determined that “LECs must provide tariffed, nondiscriminatory basic payphone services that enable independent providers to offer payphone services using either instrument-implemented ‘smart payphones’ or ‘dumb’ payphones that utilize central office coin services, or some combination of the two in a manner similar to the LECs.”¹¹ The Commission has also instructed that LECs are to file their tariffs in the states, and that “LECs are not required to file tariffs for the basic payphone line for smart and dumb payphones with the Commission.”¹²

⁹ Payphone Reconsideration Order at ¶¶163, 164.

¹⁰ Cites to the tariffs for these services appear in subsection II.L below. Illustrative pages from the state tariffs are reproduced in Attachment A.

¹¹ *Id.* at ¶ 162.

¹² *Id.* at ¶ 163 (“We will rely on the states to ensure that the basic payphone line is tariffed by the LECs in accordance with the requirements of Section 276.”)

Basic payphone line services for smart payphones have been provided by Bell Atlantic to independent PSPs pursuant to state tariffs for over a decade. Bell Atlantic will continue to provide the dial tone line and related services for smart payphones under state tariffs. These smart payphone lines will be available to both affiliated and unaffiliated PSPs under the same terms and conditions.

New basic payphone line services to support coin and coinless dumb payphones will be offered by Bell Atlantic under state tariffs. The new dumb payphone lines will provide the same functionalities and features Bell Atlantic utilizes in providing payphone services with dumb payphones, including call screening, call blocking and central office coin control to monitor, verify and return coin deposits. The scheduled effective dates for the new tariffs will be between February 15 and April 1, 1997, subject to state approval.

Basic inmate payphone lines providing the same features and functionalities Bell Atlantic uses to provide its inmate services will also be available on equal terms and conditions to affiliated and unaffiliated PSPs. State tariffs for the inmate payphone line services were filed by Bell Atlantic in 1996 pursuant to the Commission's Inmate Payphone Order.¹³

Bell Atlantic will also make available to unaffiliated PSPs additional unbundled services requested through the existing 120-day ONA service request process, where such unbundling is technically and economically feasible.¹⁴

¹³ *Petition for Declaratory Ruling by the Inmate Payphones Declaratory Ruling*, 11 FCC Rcd 7362 (1996) ("Inmate Payphone Order").

¹⁴ Payphone Order at ¶¶ 148, 200.

C. Technical Characteristics.¹⁵

Bell Atlantic will provide facilities that are comparably efficient in type, quality and all technical parameters to both affiliated and unaffiliated PSPs. All PSPs will interconnect with Bell Atlantic's basic services through standard published interfaces.

D. Interface Functionality.¹⁶

All PSPs, including Bell Atlantic, may connect their payphone CPE to Bell Atlantic's basic network through standard, publicly disclosed network interfaces. These standard network interfaces support the transmission, switching and signaling functions that are identical to those used by Bell Atlantic in providing its own payphone services. The technical specifications for these interfaces were identified in Bell Atlantic's Network Disclosure Statement for pay telephone services, published in August 1996.

No specialized interfaces, signaling, abbreviated dialing, or other unique capabilities will be provided to end users, to any PSP, or to other vendors in support of their payphone services. Any new interfaces that may be introduced in the future will be disclosed in advance, as required under the Commission's Network Disclosure requirements.

E. Resale.

Bell Atlantic will purchase all underlying basic services at tariffed rates and offer them in conjunction or combination with payphones on an unregulated, detariffed basis.

¹⁵ CI III Phase 1 Order at ¶ 160.

¹⁶ *Id.* at ¶ 157.

F. Installation, Maintenance and Repair.

Bell Atlantic will provide the same quality of installation, maintenance and repair service to both affiliated and unaffiliated PSPs. Orders for installation, maintenance and repair, for both affiliated and unaffiliated PSPs, will be assigned and completed on a non-discriminatory basis. Unaffiliated PSPs will be able to report network service problems in the same manner as the affiliated PSP and will be able to use the same service ordering methods (*e.g.*, telephone call, facsimile and/or electronic transmittal) to establish network access. All PSP orders will be subject to the same scheduling and dispatch processes. Due dates and time periods for completion for PSP orders will be provided and scheduled without any discrimination or preference between affiliated and unaffiliated PSPs.

G. End User Access.

End users will be able to place calls from payphones of both affiliated and unaffiliated PSPs using Bell Atlantic's basic dial tone line services in the same manner. All PSPs will have an equal ability to provide end users the same network dialing and calling capabilities as are available to Bell Atlantic PSP end users.

H. CEI Availability.

In compliance with the Payphone Order,¹⁷ access to all basic network exchange services will be available to both affiliated and unaffiliated PSPs by April 1997 in all geographical areas served by Bell Atlantic. Unaffiliated PSPs have used Bell Atlantic's

¹⁷ Payphone Order at ¶ 146; Payphone Reconsideration Order at ¶ 146.

existing basic payphone line services to operate smart payphones for many years. Inmate payphone line services have also been available from Bell Atlantic since 1996 in compliance with the Commission's Inmate Order.

The new state tariffs for dumb payphone lines will be filed by January 15, 1997. Bell Atlantic will make CEI testing for these new dumb payphone lines available to any unaffiliated PSP that request it.

I. Minimization of Transport Costs.

The Commission has held that this condition is satisfied where, as here, affiliated and unaffiliated PSPs are charged the same rates for all underlying services.¹⁸

J. Recipients of CEI.

All of the underlying basic services that Bell Atlantic will use to provide its deregulated payphone services are available to all unaffiliated payphone service providers for any lawful purpose.

K. Allocation of Joint and Common Costs.

Joint and common costs will be allocated pursuant to Bell Atlantic's Cost Allocation Manual (CAM). Bell Atlantic will file CAM changes to cover the accounting

¹⁸ *Amendment of Section 64.702 of the Commission's Rules and Regulations (Third Computer Inquiry), Memorandum Opinion and Order (Phase II Reconsideration Order)*, 3 FCC Rcd 1150 ¶¶ 32-34 (1988).

of unregulated payphone service costs as prescribed by the Commission in the Payphone Order.¹⁹

L. Sample Tariffs.

Attachment A contains illustrative state tariffs describing the basic payphone line services and associated features and functions that Bell Atlantic will offer to all payphone service providers. The tariffs include both smart payphone and inmate lines already available under current tariff as well as the new lines for dumb payphones. These pay telephone line services are:

- a) Network Controlled Coin Line (One-Way Outgoing and Two-Way)
- b) Network Controlled NonCoin Line (One-Way Outgoing and Two-Way)
- c) Network Controlled Inmate Line (Coin and Coinless)
- d) Station Controlled (COCOT) Line.

The relevant tariffs for the line services and associated features in each state are as follows:

BA-D.C	P.S.C. - D. C. Tariff No. 202, Section 4D
BA-Md	P.S.C. - Md. Tariff No. 202, Section 4D
BA-VA	S.C.C. - Va. Tariff No. 202, Section 4D
BA-WV	P.S.C. - W.Va. Tariff No. 202, Section 4D
BA-NJ	B.P.U. - N.J. Tariff No. 2, Section 5.5

¹⁹ Payphone Order, at ¶163 (“LECs should establish whatever cost pools are needed and should file revisions to their cost allocation manuals within sixty (60) days prior to the effective date of the change. [Footnotes omitted]).

BA-PA Pa. P.U.C. Tariff No. 1, Section 18

BA-DE P.S.C. Del. Tariff No. 1, Section 16

M. Nondiscrimination Reporting

Bell Atlantic will continue to comply with applicable FCC orders relating to annual nondiscrimination reporting, as may be revised by the Commission under its rulemaking authority.

N. Network Interface Disclosure.

Bell Atlantic will comply with the Commission's rules²⁰ relating to network disclosure of any new services or network changes that affect the interoperability of payphone services with the network. Disclosures pertinent to the basic tariffed services described in this plan have previously been made by Bell Atlantic.

O. Customer Proprietary Network Information.

Bell Atlantic will comply with existing CPNI requirements as well as any applicable new regulations that may be adopted by the Commission to comply with Section 222, as added by the 1996 Act to supplement or supersede the existing rules. Password restricted access will preclude the affiliated PSP's sales and marketing personnel from accessing any CPNI of unaffiliated PSPs or others.

²⁰ See 47 C.F.R §§51.325-51.335.

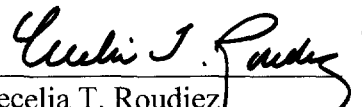

III. Conclusion

Bell Atlantic respectfully requests expeditious approval of its plan to provide comparably efficient interconnection and permission to provide structurally unseparated payphone services.

Respectfully submitted

ATTACHMENT A

Bell Atlantic - Maryland, Inc.

Section 4D
Original Page 1

PAY TELEPHONE LINES (PTL)

(N)

A. GENERAL

Pay Telephone Lines (PTL) are individual dial tone line Local Exchange services for use by pay phone service providers to connect coin, coinless and/or combination coin/coinless pay telephones to the Telephone Company's network.

B. REGULATIONS

1. Four types of PTL are available: Network Controlled Coin Line (NCCL), Network Controlled Non-Coin Line (NCNL), Network Controlled Inmate Line (NCIL) and Customer-Provided Coin Operated Telephones (COCOTS).

2. Explanation of Terms

- a. Network Controlled Coin Line (NCCL)

The Network Controlled Coin Line (NCCL) is a dial tone line, message or measured rate, Local Exchange service for use with coin-operated pay telephones.*

The NCCL is equipped with network coin control capability which includes coin collect and return features, call rating capabilities and unique operator services which allow an end user to signal the operator during a call.

- b. Network Controlled Non-Coin Line (NCNL)

The Network Controlled Non-Coin Line (NCNL) is a dial tone line Local Exchange service for use with non-coin pay telephones, including card reader or credit card telephones. This line prevents the completion of chargeable direct dialed local or chargeable direct-dialed toll calls without operator intervention.

- c. Network Controlled Inmate Line (NCIL)

The Network Controlled Inmate Line (NCIL) is a dial tone line Local Exchange service for use with coinless and coin-operated telephones provided on the premises of city, county, state or federal prisons where institutionally authorized telephone programs warrant the service.

* Local messages will be billed on an unlimited flat basis until a message and measured rate exchange line is technically feasible for coin-operated telephones. At that time all NCCL lines equipped with flat rate service will convert to a message or measured rate exchange line.

(N)

Bell Atlantic -Maryland, Inc.

Section 4D
Original Page 2

PAY TELEPHONE LINES (PTL)

(N)

B. REGULATIONS (Cont'd)

2. Explanation of Terms (Cont'd)

c. Network Controlled Inmate Line (Cont'd)

NCIL is provided for the purpose of originating: collect messages from coinless telephones and collect and local sent-paid messages from coin-operated telephones to numbers in the Telephone Company's North American Dialing Plan.

Calls to Telephone Company numbers such as repair service, directory assistance, live operator (0-), Toll Free numbers, 10XXX, and public emergency service numbers such as 911 will be blocked from all Network Controlled Inmate Lines.

The following are standard blocking/screening features of the NCIL service:

- (1) Toll Billing Exception - is an inward screening that disallows the billing of collect or third number calls to the line.
- (2) Originating Line Number Toll Screening - provides special screening codes to the operator identifying any outward call screening on the line.
- (3) 900 blocking - prevents an exchange user from accessing 900 service telephone numbers.
- (4) Audiotex Blocking - prevents the completion of outgoing calls placed directly to an Audiotex Service telephone number.

d. Customer-Provided Coin-Operated Telephone Service (COCOTS)

Customer-Provided Coin-Operated Telephone Service (COCOTS) is a dial tone line, message or measured rated, Local Exchange service designed for use with station controlled pay telephones.

Call Screening, when used in connection with COCOTS, is an optional arrangement whereby outgoing calls, which are routed to a Telephone Company operator, will be processed only on a bill to third number, collect call or calling card basis as instructed by the calling party.

(N)

Bell Atlantic -Maryland, Inc.

Section 4D
Original Page 3

PAY TELEPHONE LINES (PTL)

(N)

B. REGULATIONS (Cont'd)

3. NCCL and NCNL exchange lines may be provisioned as Two-way or One-way, Outgoing Only exchange lines.
4. NCCL and NCNL exchange lines prevent the completion of incoming collect or third number calls, when such calls originate within the continental United States and when such calls are processed through the billing verification database. Outgoing operator handled calls are restricted to collect, third number and calling card only.
5. Directory Listings are not available with NCIL, One-way, Outgoing Only NCCL and One-way, Outgoing Only NCNL exchange lines.
6. Directory Listings are available with NCCL Two-way, NCNL Two-way, and COCOTS exchange lines subject to the regulations applicable to listings for individual line business service.
7. The following options are available for NCCL, NCNL and COCOTS exchange lines.
 - a. Audiotex Call Blocking - subject to the regulations and rates specified in Section 9A of this Tariff.
 - b. 700/900 Call Restriction - subject to the regulations and rates specified in the General Services Tariff, Section 6.
8. Line Side Answer Supervision may be provided on NCNL and COCOTS exchange lines. This optional feature detects and provides signaling to activate billing mechanisms upon connection of a call and deactivate billing mechanisms when the call is terminated.
9. Pay telephones connected to a PTL exchange line must be registered in compliance with Part 68 of the FCC's Rules and Regulations.
10. Only one pay telephone will be permitted to be connected to each PTL exchange line. Extensions must be configured and wired so that only one telephone will operate on the line at one time.
11. NCCL, NCNL and COCOTS subscribers are subject to the same Directory Assistance rates applicable to business service specified in the General Services Tariff, Section 9.
12. Exchange users of NCCL, NCNL and COCOTS must be permitted access, at no charge, to Universal Emergency Number 911 Services.

(N)

Bell Atlantic - Maryland, Inc.

Section 4D
Original Page 4

PAY TELEPHONE LINES (PTL)

(N)

B. REGULATIONS (Cont'd)

13. Nonpublished and Nonlisted Telephone Service described in the General Services Tariff will be provided at no charge upon the PTL subscriber's request.
14. The PTL subscriber shall be responsible for the installation, operation and maintenance of any pay telephone used in connection with this service.
15. The PTL subscriber shall be responsible for payment of all charges, including appropriate local, toll and FCC charges, associated with the provisioning of this service.
16. Long Distance Message Restriction is available on an optional basis on NCNL lines, subject to the regulations and rates specified for business in the General Services Tariff, Section 6.
17. NCIL may be provisioned as a:
 - (1) Coin One-way, Outgoing Only Mechanized Collect access line*
 - (2) Coinless One-way, Outgoing Only Mechanized Collect Only access line
 - (3) Coinless Two-way access line

C. RATES

1. The local service areas and applicable local message charges are as specified for business in Section 2 of this Tariff.
2. All sent-paid intraLATA toll calls will be handled by the Telephone Company and charged at the appropriate rate specified in the Long Distance Services Tariff, Section 2B for Operator Services or FCC No. 4 Tariff.

Any sent-paid intraLATA toll call that is not rated by the Telephone Company will be charged at the rate specified in the Long Distance Services Tariff, Section 2A for Business Two-Point Service.
3. The Service Charges for PTLs are as specified in the General Services Tariff, Section 3.

* Coin NCIL is provisioned the same as the Coinless NCIL (One-way, Outgoing Only Mechanized Collect Only), except local sent-paid messages are permitted.

ILLUSTRATIVE TARIFF

5.5 PUBLIC COMMUNICATION SERVICE - COIN AND COINLESS (Cont'd)

5.5.3 CUSTOMER-PROVIDED PAY TELEPHONE SERVICE (CPPTS)

A. DESCRIPTION

1. General

Customer-Provided Pay Telephone Service (CPPTS) is a message-rate, switched access, business exchange service for use with customer-provided pay telephones (CPPTs). A CPPTS line provides basic exchange access service plus an inward screening arrangement which identifies and disallows collect and third number calls to the CPPTS line.

A CPPTS line may be obtained with a Limited InterLATA Dialing (LID) arrangement. This arrangement blocks the completion of interLATA calls identified by the Company as 1+ interLATA calls originating from a CPPTS line (including 10XXX 1+ calls), except Toll Free calls and calls that the Company transports within a local calling area that is situated in two LATAs. This service is provided where facilities permit.

A Line Side Answer Supervision (LSAS) arrangement is available on an optional basis. This arrangement sends a signal to the network interface associated with the CPPT when the Company's facilities detect that the called party's line goes off-hook or on-hook. This service is available where facilities permit.

An Outward Screening arrangement is also available on an optional basis. With this arrangement, operator-handled calls originating from a CPPTS line are restricted to collect, third number, and calling card calls, all of which can be made on a person-to-person or station-to-station basis.

B. REGULATIONS

1. General

CPPTS is the only exchange service provided by the Company for use with customer-provided pay telephones or coinless public telephones connected and operated by customers other than Interexchange Carriers (ICs). Interexchange carrier coinless public telephones are subject to the regulations outlined in A5.5.4.

CPPTS is subject to the resale regulations outlined in A2.2.5.

Connection of more than one CPPT to a single CPPTS exchange line will be permitted, but is limited to those locations where CPPTs are associated with common equipment dedicated solely to CPPTS and arranged so as to ensure user privacy and provide no inordinate levels of call blocking.

The discount provisions of A2.3.4 are not applicable.

A directory listing is available with each CPPTS line.

ILLUSTRATIVE TARIFF

5.5.3 CUSTOMER-PROVIDED PAY TELEPHONE SERVICE (Cont'd)

B. REGULATIONS (Cont'd)

1. General (Cont'd)

A CPPTS line does not include a local message unit allowance unit or a Directory Assistance call allowance.

Customers disconnecting New Jersey Bell Semi-Public Telephone Service and installing CPPTS have the option of retaining their current semi-public telephone number. However, customers installing CPPTS where New Jersey Bell Public Telephone Service previously existed are not entitled to retain the same number.

Selective Calling Service cannot be provided in conjunction with CPPTS.

Touch-Tone calling (USOC TTB), as specified in A5.4.2 preceding, is available on an optional basis.

2. Responsibility of the Customer

The customer shall be responsible for the installation, operation and maintenance of any customer-provided pay telephone used in connection with this service.

The customer shall be responsible for payment of all charges associated with this service including toll charges. Adjustments to the customer's local message and/or toll bill will not be made.

Customer-provided pay telephones must be registered in compliance with Part 68 of the FCC's Registration Program or connected behind an FCC registered coupler.

Customer-provided pay telephones must comply with all applicable federal, state and local laws and regulations concerning the use of these telephones by disabled persons and the hearing impaired.

3. Operational Characteristics Required in BPU Order Dated August 18, 1986

Customer-provided pay telephones:

- Must be able to access an operator (dial-0) at no charge and without using a coin.
- Must be able to access Directory Assistance. Charges for such access are limited, as a maximum, to those of the underlying carrier as described in A5.7.2,C.
- Must be able to dial 0 (operator) plus the appropriate number of digits for Calling Card, Collect and Third Number calls at no charge and without using a coin.

A5. EXCHANGE SERVICES

ILLUSTRATIVE TARIFF

5.5.3 CUSTOMER-PROVIDED PAY TELEPHONE SERVICE (Cont'd)
B. REGULATIONS (Cont'd)

3. Operational Characteristics Required in BPU Order Dated August 18, 1986
(Cont'd)

- Must be able to access 911 Emergency Service, where available, at no charge and without using a coin.
- Must be able to access all interexchange carriers, where available.
- Must be able to access Toll Free numbers, 950 Interexchange Carrier numbers, and Interexchange Carriers in equal access exchanges at no charge and without using a coin. Where Interexchange Carriers do not have equal access service or a 950 number, CPPT providers may charge applicable local or toll rates for calls to the Interexchange Carrier's non-equal access numbers. *
- Must allow the completion of both local and long distance calls.
- The customer shall cause to be prominently displayed on each customer-provided pay telephone used in connection with this service clear and concise dialing instructions. Refund and station ownership information must be provided to CPPT end users, but, at the option of the CPPTS provider, may be either posted at the station set or available via a free information number. In addition, the source for obtaining refunds must be a party within the State of New Jersey.
- The customer may not charge users of their pay telephones more for the initial or additional periods of a particular local message than the underlying carrier is authorized to charge for the initial or additional periods of a local message through its pay telephone service.

4. Extension Service

Customer-provided extension station sets may be connected to a CPPTS line thru a customer-provided device which would ensure the privacy of the pay telephone user. If the customer-provided pay telephone arrangement is technologically unable to "block" the extension, the pay telephone provider should prominently display information advising users that the pay telephone is not private and is subject to monitoring by the associated extension.

5. Outward-Only CPPTS

CPPTS providers may prevent incoming calls, but when doing so must conspicuously post notice of the CPPT's inability to accept incoming calls on or within close proximity of the CPPTS station set. Additionally, CPPTS subscribers wishing to provide outward-only service must subscribe to non-published directory listing service and pay the appropriate charge as specified in A5.7.1,D for each service location.

Outward Screening Arrangement			
- per access line #.....	9.00	1.50	PSES0

2. Local Messages

This service does not include a message unit allowance. Where local calls are not blocked by the IC, the charges are as specified in A5.2.2,B. for local messages directly dialed from non-coin telephones. The number of local message units applicable to the initial and overtime periods is as provide in A5.2.2.

3. Toll Messages

Where intraLATA toll calls are not blocked by the IC, charges are as specified in A6.2.1 for Direct Distance Dialed unassisted messages.

4. Directory Assistance Calls

This service is exempt from Directory Assistance charging.

5.5.5 INMATE TELEPHONE SERVICE

**
*

A. DESCRIPTION

Inmate Telephone Service (ITS) is a message-rate, business exchange service for use with coinless telephones provided on the premise of city, county, state and federal correctional facilities.

ITS is provided for the purpose of originating messages from coinless telephones to numbers in the North American Dialing Plan from authorized correctional facilities.

ITS may be provisioned as an ITS Exchange Access line or ITS Exchange Access Line - Outward only and each provides an inward screening arrangement which identifies and disallows collect and third number calls to the line.

*
**

† Refer to A3. for applicable SERVICE CHARGES.

If installed subsequent to the associated ICCTS line, an ELEMENT 1B charge applies.
